

COLLIN MATH CLUB

Math History

Egyptian Mathematics

Friday, April 4, 2014 at 1:30 p.m.
PRC—Conference Center

The third in the Math History Seminar series, this seminar will be an examination of Egyptian Mathematics. We will investigate how this ancient culture carried out simple calculations including multiplication, division, fractions, and solving equations. We will also look at the sources for our current knowledge about Egyptian mathematics.

Students and Faculty are encouraged to attend

Presented by Chip Galloway, Professor of Mathematics
