When completed in Fall 2020, the Technical Campus will be a comprehensive campus offering students multiple paths to success in high-demand, high-wage career fields including automotive, construction, health care, information technology, and manufacturing.

**FAST FACTS**

- The Technical Campus will be located along Hwy. 121 between Exchange and Alma.
- It will be a 340,000 square-foot, three-story facility on a 32-acre site.
- The campus will serve up to 7,100 students when fully occupied.
- The campus's “trade bars” are dedicated to major career concentration areas.
- “Learning yards” located between trade bars provide exterior spaces for cross-discipline work and project-based learning.
- Students will learn on the same equipment currently used in the field.
The need for a technical campus in Collin County

- A new pipeline of workers is needed to fill occupations that are expected to grow by 20 percent or more.

- Collin College’s comprehensive master plan calls for developing programs to train future employees for high-need, high-growth, and high-wage occupations in North Texas.

- Industries relying on skills in construction, advanced manufacturing, automotive technology, collision technology, and health care are booming in Collin County.

- Students will be educated for careers and can graduate without incurring high student loan debt.

- Strategic partnerships with local school districts will expand dual credit and career and technology education programs without duplicate costs.

- High school students will be able to enroll in dual credit CTE programs and graduate with industry-recognized certifications and college credits toward Associate of Applied Science degrees.

Collin College Technical Campus

High Demand Programs at the Technical Campus

- Advanced Manufacturing – Biomedical Equipment Technology, Electronic Engineering Technology, and Industrial Automation
