Hello, Everyone

As a follow-up to last week's email about Degree Candidacy changes for business majors, please continue reading to learn about the newest opportunities and support available for OU transfer students.

**Price College has two exciting new offices offering student services!**

The [Center for Student Success](#) (CSS), created to provide students with exceptional training opportunities, is introducing the **PATHWAY TO SUCCESS** program for all students matriculating through Price College. Students earn points toward their graduation by participating in curricular, co-curricular, and extra-curricular activities. This innovative program provides students a flexible, yet structured framework, for their active participation in workshops, programs, and opportunities identified by the Center inside and outside Price College. The activities collectively represent the different pathways to success for all business students regardless of their majors. The Center's mission is to help enhance student engagement through a variety of opportunities and experiences that will prepare students to compete and succeed in a diverse global business environment.

The Office of Diversity & Inclusion has been created to implement core areas the Diversity Committee recommended. These areas include: recruitment and retention of minority students and other underrepresented students and faculty; curriculum on inclusive teaching and other high-impact practices; mentoring and embedding faculty and students in a supportive community; community outreach and development and corporate connections. The office also oversees the [Multicultural Business Program](#) (MBP), which has doubled its student enrollment and funding. The MBP is now open to qualifying transfer students.
NEW academic programs at Price:

- A Healthcare minor offered through the Marketing & Supply Chain Management division for students within Price College
- A Master's in Information Technology accelerated program is now available through the Management Information Systems division for all students who meet the program's requirements. The MIT accelerated program is available to all majors.

BAD 1001 Productivity Tools Waiver
Currently, there are no equivalents for our BAD 1001 Productivity Tools course. However, if a student has a productivity tools course from your institution, he/she will be allowed to take an EXCEL exam. If the student passes the exam, the requirements will be waived.

Again, please visit www.ou.edu/Price for more information or for direct answers to advising questions, please email Cristela Carrizales, Senior Academic Advisor, at ccarrizales@ou.edu.
