# Collin College | OneLogin

Setting Up Multi-Factor Authorization
Using your Smartphone and a computer

1. Open a web browser on your computer and go the OneLogin Portal at http://collin.onelogin.com

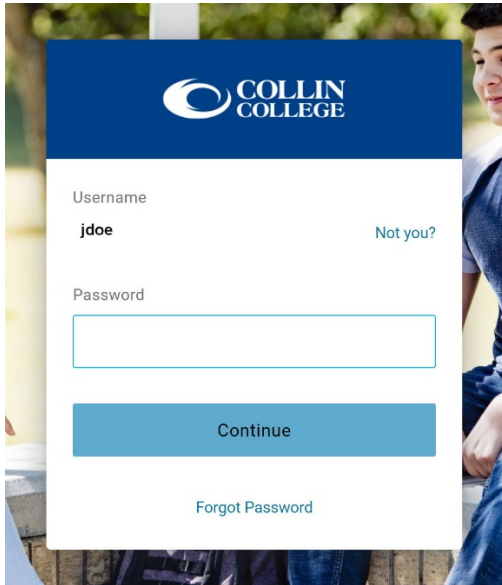

2. Enter your **Username** and click **Continue**
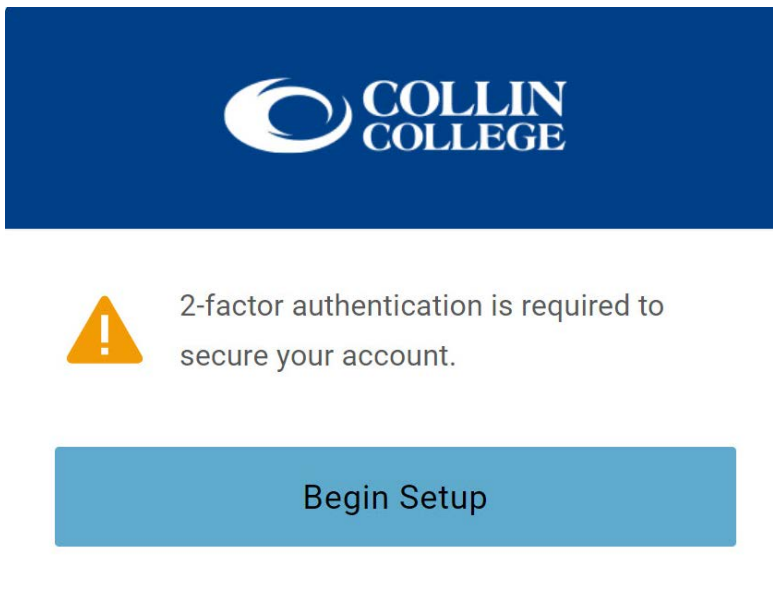

3. Enter your **Password** and click **Continue**

Register an Authentication Factor

Collin College requires MFA, you will be prompted to register a new authentication factor when you first login. Click on **Begin Setup**.
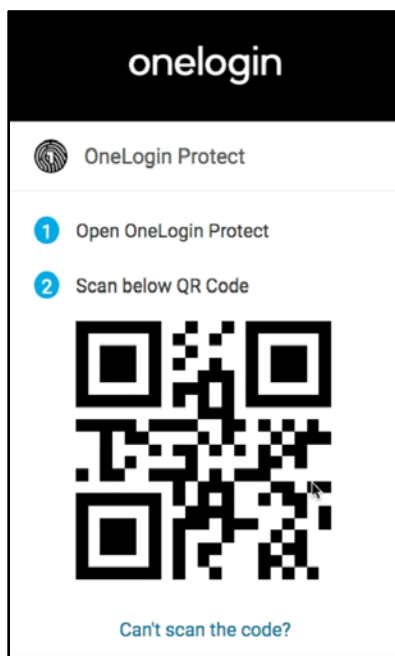

Collin College | OneLogin

1. Since you have previously installed the app, click on **Activate**.

A QR code will appear in your browser, keep this window open and available to scan the QR code.

2. Open the OneLogin Protect app on your device.
3. Click the **+** sign in the middle of the app's screen or in the upper right corner.
4. A QR reader will open with frame in the middle of your screen.
5. Use the QR reader to scan the code on your monitor.
6. When the scan is successful you will see a green checkmark over the code in the app.
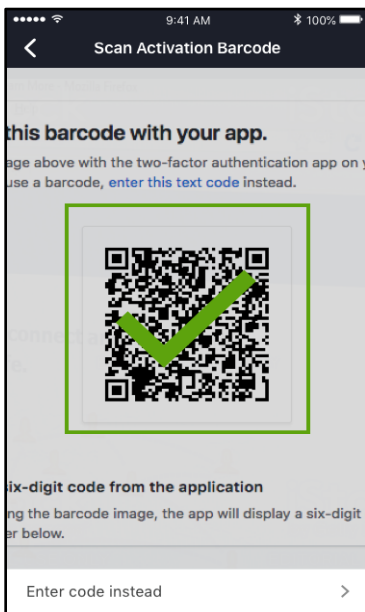

You should see your OneLogin account has been added to OneLogin Protect.
