

## OneLogin Setup Instructions using Android

### 2 Requirements: Android 5.0 or later and a device Passcode/Screen Lock setup (see Step #7)

1. Click on the Google Play store app to open it.

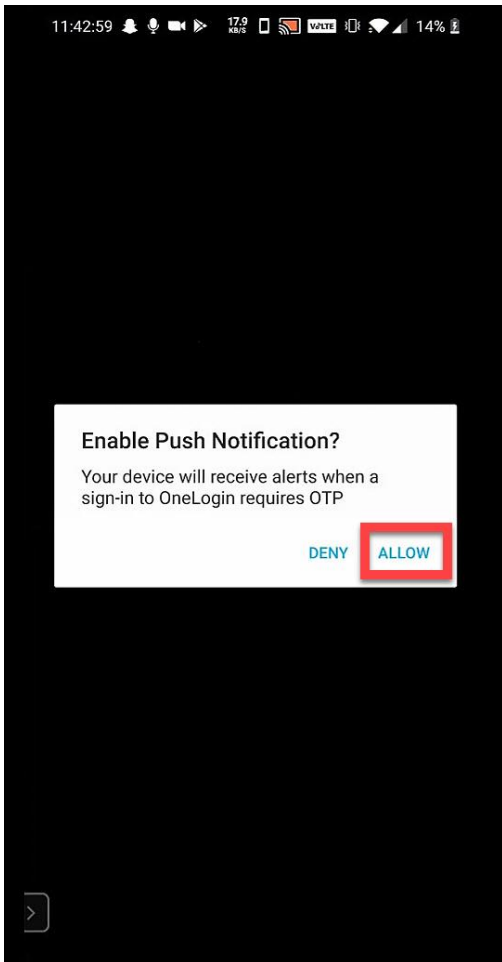

2. In Google Play store, search OneLogin Protect.
3. Find the app and click Install.

4. You may be prompted by the Google Play store to Sign in using your account.
5. Once the App downloads and installs, the App will open.

6. You will get a message that the Protect App would like to send you notifications. Click Allow.

7. OneLogin requires a Passcode/Screen Lock.

To enable, a screen lock, go to Settings then Security, then Screen Lock and select what type of screen lock that would like.
