Develop the blueprint for your future. As a Computer-Aided Drafting and Design professional you will use specialized software to create blueprints, plans, or schematics showing how a structure should be created. Use your skills in aeronautics, civil engineering, architecture, process pipelines, mechanics, or electronics fields.

CADD Program

High-tech industries are continually creating new career opportunities in exciting, highly-specialized fields. A degree in Computer-Aided Drafting and Design (CADD) can provide you with both an educational foundation in CADD and insight into current industry practices. Get hands-on training and learn the skills a designer, CADD operator, architect, or engineer needs for a successful career.
