Advance Your Career with a BAS degree
Collin County is one of the fastest growing counties in the nation with prolific construction projects in both residential and commercial properties. Collin College’s BAS in Construction Management degree will prepare students for advancement within the career field by providing a blended skillset of architecture and engineering with the know-how to manage those processes from a business perspective.

About the BAS program
Collin College’s BAS in Construction Management degree will prepare students for advancement by teaching successful graduates a wide range of marketable skills including management principles; scheduling, planning, and cost estimating for construction projects; behavior of building structures/components; principles of mechanical, electrical, and plumbing systems; project safety; and risk management.

Why Collin College?
• Earn a BAS in Construction Management at Collin College’s tuition rate, less than at a four-year university.
• Learn from industry professionals and receive hands-on experience in the field.
• Attend classes at the state-of-the-art Technical Campus.
