

# Insurance Management

**Without insurance, there would be little** construction, manufacturing or health care. Insurance professionals ensure that individuals and businesses have the funds to recover from unforeseen events. Bad things happen, but insurance and insurance management allow people's lives and the economy to operate smoothly in spite of that risk. If you are interested in helping others, are analytical and are willing to put in the work to make sure your client succeeds, an insurance degree from Collin College can help you make that happen.

**Insurance Industry**

Collin College's insurance certificates can open doors for you in the business world while laying the groundwork for continued study. All courses taken for insurance management certificates also apply to the Associate of Applied Science (AAS) degree. An AAS degree in insurance management from Collin prepares you to enter the job market or pursue a bachelor's degree.

### Program Features

- Nine industry-specific courses including Special Topics and Local Need courses tailored to the local area
- Classes are available at the Plano Campus (Spring Creek)

## About Collin College's Program

No matter if you are new to the insurance industry, already employed in an insurance management career or operating your own business, the Insurance Management Program at Collin College incorporates courses that will help you learn at your level. The Insurance Industry degree and certificate program at Collin College is designed to prepare students for a variety of positions in the Insurance Industry. Students have the opportunity to attain professional designations while completing coursework at Collin College.

Collin College is an equal opportunity institution and provides educational and employment opportunities without discrimination on the basis of race, color, religion, sex, age, national origin, disability, veteran status or other legally protected class.
