(18 Credit Hours)**

## About Collin College's Program

Collin College's wireless networking track prepares graduates to design and install enterprise wireless networks based on a customer's requirements. The skills learned in the program will enable a wireless technologist to ensure maximum performance of the wireless network in addition to securing users' data. Students will learn critical thinking skills through hands-on labs and troubleshooting activities while they gain the practical knowledge needed to be successful in a wide range of industries.

### Coursework includes preparation for:

- Certified Wireless Network Professional Certifications
- Aruba Certification classes coming in 2021
