

Computer Networking

Digital communication is the backbone of modern society. You can be one of the professionals who assures information is accessible and secure with a degree or certificate in computer networking from Collin College.

Computer Networking Program

Collin College's computer networking program prepares graduates to design and install secure network systems based on customer requirements, monitor and maintain network traffic and security, and maintain network hardware and software. Learn teamwork and critical-thinking skills through hands-on activities and network simulations. Gain the practical knowledge you need to be successful in a wide range of industries.

Choose your degree track:

Infrastructure - design and install secure network systems with a focus on managing network devices

Systems - manage server systems

Integrated Networking Technologies - design and secure network systems with a focus on cloud storage and virtualization networking technologies

Wireless - design, maintain, and secure the wireless access that has become the industry standard

Coursework includes preparation for:

- CompTIA Certifications
- Cisco Certifications
- Microsoft Certifications

Networking Opens Doors

AAS – Computer Networking – Infrastructure Track

AAS – Computer Networking – Systems Track

AAS – Computer Networking – Integrated Networking Technologies Track

AAS – Computer Networking – Wireless Track

60 credit hours (each)

To see certificate options, visit https://www.collin.edu/academics/programs/CNET_1Overview.html

Network and Computer Systems Administrators

Average Salary: \$92,800
21% growth

Computer Network Support Specialists

Average Salary: \$80,200
21% growth

Data obtained from JobsEQ (Collin County), O*NET, and Workforce Solutions of North Central Texas
Note: Job growth projected from 2019-2025
Note: The earning potential for employees with certifications and associate of applied science degrees may exceed the average salary
