COLLIN COLLEGE

Health Information Management

Healthcare workers need data to make the right choices.

Health Information Management (HIM) professionals collect, protect, and provide the appropriate data to people and organizations when they need it most. As a HIM professional, you will work with doctors, hospitals, researchers, insurance companies, and individuals to ensure that accurate information leads to the right medical choices. If you want to help healthcare professionals ensure the availability, accuracy, integrity, and security of much-needed health data, a career in health information management is the right choice for you.

Health Information Management

Medical Records Specialists and Health Technologists and Technicians

Average salary: $54,200
Average job growth: 11.4%

Salary and growth data on "Medical Records Specialists and Health Technologists and Technicians, All Other" obtained from the Bureau of Labor Statistics, Chmura, and JobsEQ.
Note: Job growth is projected from 2026-2033.

About Collin College's Program

The program is accredited by the Commission on Accreditation for Health Informatics and Information Management (CAHIIM). The curriculum is based on the American Health Information Management Association (AHIMA) Foundation's curricular competencies for the Registered Health Information Technician (RHIT) credential.

Program Features

- The Collin College Health Information Management program has a partnership with several university partners, providing students with 3+1 and 2+2 pathways to baccalaureate degrees.
- All HIM classes are conducted online.
- The program works with local healthcare facilities to provide a required clinical component.
