

Information Systems Cybersecurity

Cybercrime is on the rise and can impact every business and industry. Are you ready to be part of the solution? Do you have the latest certificates and skills to keep pace with ever-evolving technology? Keep important information safe and secure your future with an associate degree in cybersecurity.

Collin College Information Systems Cybersecurity Associate Degree Program

Our cybersecurity program will prepare you for a career in cybersecurity management and support with an education in network management, system administration, technical support, hardware/software installation, and equipment repair. Learn about computers and technology devices and how they operate. Gain skills in computer networking and discover how to protect devices using cybersecurity concepts. As a graduate with an Associate of Applied Science, you will be able to design and install secure network systems based on customer requirements, monitor and maintain network traffic and security, and maintain network hardware and software.

Coursework includes preparation for:

- CompTIA Certifications
- EC-Council Certifications
- (ISC)2 Certifications
