# Same Story - Worse Results

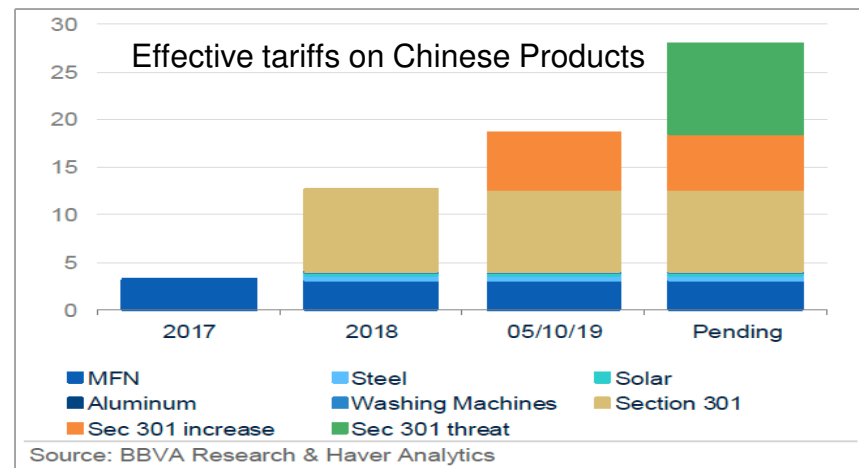

During the entire month of May the focus remained on trade as the vagaries of the international negotiations fluctuated so did markets. News regarding the Chinese and Mexican proposed tariffs were interspersed with other geo-political problems. As tempers flared and uncertainties grew, investors started to feel the increasing pressure of uncertainty. As compromise was reached on Mexico, markets once again focused on at least more fundamentals some of which are weak and some strong.

With increased optimism at the beginning of the month for a swift Chinese resolution, markets soared but as negotiations slowed, calls for a Fed rate cut intensified. Instead of the prior possible one hike in late 2019, the markets have built in a quarter point *cut* in July. Remembering that in December we all looked for three more hikes this is a major impact to the markets. The question is whether the fundamentals support it or whether it is primarily market-angst.

The Fed could continue to try to steepen the curve with purchases of short securities as part of their “portfolio maintenance” program and the large supply with runoff of longer securities from QE, but, the chance of a cut is definitely increasing. The economy is stuttering and geopolitical concerns keep investors wary and worried.

Geo-political forces also continue to take center stage. The last days of May were indeed the last days of [Theresa] May. (She will resign June 7) Three years trying to negotiate a Brexit deal honoring the referendum that brought her to power were unsuccessful. Now, with the October deadline looming the UK and the EU are on hold until a new PM successor is elected. This is bad news for both parties as the EU struggles to increase inflation and employment.

UK problems however are over-shadowed by North Korea’s growing arrogance and Syrian saber rattling. If you are looking for inflation look to Venezuela where inflation spiraled to 130,060% in 2018 as recently reported by their central bank.

# The Pace Slows...But Why?

The regional Fed quarterly reports show economic conditions in their respective regions as mixed but the consensus does show a slowing. It is questionable whether the economy would slow as much without trade tantrums storming but the statistics do indicate a moderating trend. Stuttering is not stopping. Even with all the weakened economic statistics, inflation is holding firm near the Fed's target. With the core PPI up above expectations the talk of *multiple* rate cuts is not supported by reality.

There is plenty of data to support moderate cut talk but none of it represents a *strong* argument beyond the fact the economy is weaker – not weak. 1Q GDP has now been revised down to 3.1% (from 3.2%) but it still remains a two quarter high. YOY the US economy continues to expand but at a much slower pace.

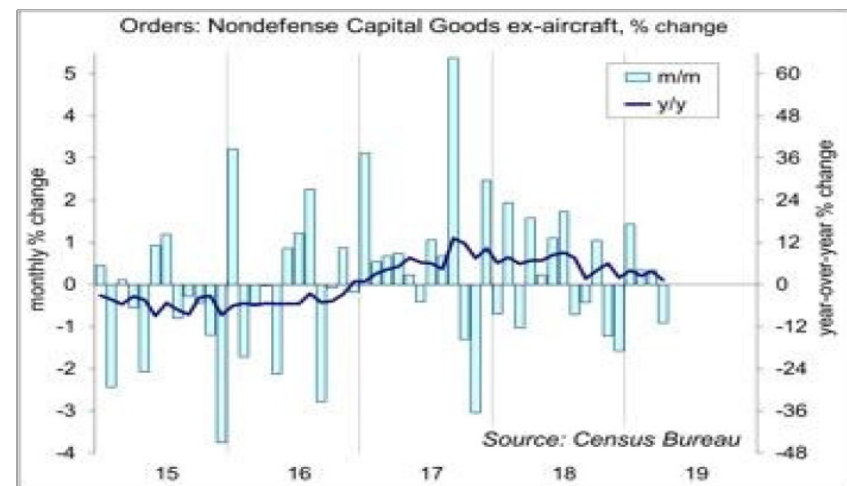

Durable goods was a shock and echoed the overall slump. Its disappointing miss gives evidence of the trend. Year-over-year the durables showed weakness in orders, non-defense goods, and transportation. And, although wages are still climbing slowly, overall employment has slowed from technology impacts. If companies see a slowing in the economy they also slow their pace of hiring – beginning that spiral to higher unemployment rates.

Private investments have also been affected by the trends and wild market fluctuations. Business investments fell in buildings as well as on equipment and intellectual property/technology.

In the housing area, new home sales are a natural victim of the slowing. New home sales dropped to a 2-month low and the median price of a new home rose 11.9% to \$342k. Buying a home – even with the low mortgage rates – loses its appeal in such circumstances.

Farmers have been hard hit by the trade wars. A farmer relief plan is in the works which will cost \$16B. This will go primarily to farmers of commodities such as soybeans, corn and sorghum whose prices have slumped for a year and who were severely impacted by spring flooding. Corn is down 10% from last year and soybeans are down 20%.

It continues to be difficult to read the tea leaves if trade woes were suddenly to disappear or lessen, but, without a major change the situation may drag us lower. Interestingly however emerging markets equity markets are strengthening which could reduce some of the investment in our treasury market. Which one wins is still the question.

# The Inversion Increases

- The equity markets remain robust but the inversion in the Treasury curve forced by heightened buying remains, although the shortest inversion(3-6 month) has dipped further in May signaling a real concern by investors in the economy's health.
- The possibility of lower rates anticipated by the market – although not signaled by the Fed - has convinced investors to lock in some rates as a hedge against lower rates. The buying drives the yield down (prices up). Rate changes during May clearly showed the value of extending portfolios somewhat as the equity markets and uncertainty drive funds into fixed income markets driving rates lower.
- The long end (30yr) has been slow to believe any news but the move down since last October has finally pushed even the 30 year downward.
- Part of the move has to be explained also by comparable rates in other major global economies. The yield on the German 10-year is now a *negative!* (-0.22%) That has to make the US at 2.50% look quite attractive. But it also shows a weaker global economy.

End of Month Rates - Full Yield Curve – Fed Funds to 30yr

*Collin County Community College District*  
 Quarterly Investment Report  
 March 1, 2019 – May 31, 2019

**Portfolio Summary Management Report**

This quarterly report is prepared in compliance with the Investment Policy and Strategy of the District and the Public Funds Investment Act (Chapter 2256., Texas Government Code).

Julie Bradley, Interim Chief Financial Officer  
 Collin County Community College District

---

Linda T. Patterson, President  
 Patterson & Associates as Investment Advisor, CCCCDC

---

Barbara Johnston, Associate V.P.  
 Collin County Community College District

---

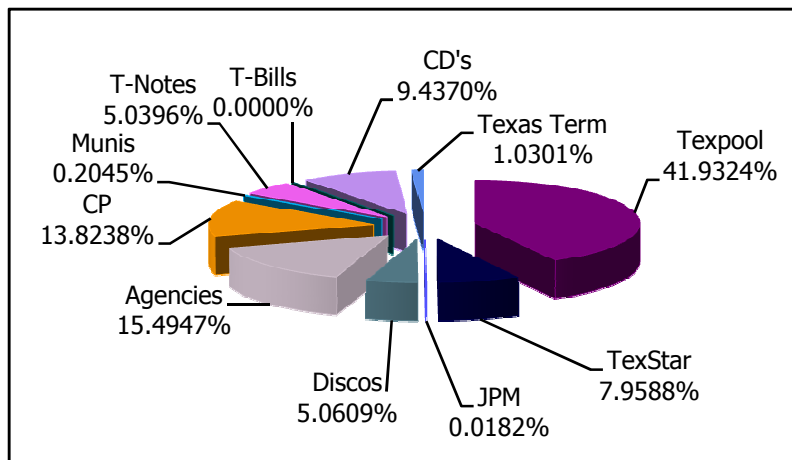

<sup>1</sup> WAM – weighted average maturity

<sup>2</sup> “Change in Market Value” is required data, but will primarily reflect the receipt and expenditure of the District’s funds from quarter to quarter. *Patterson & Associates* has assisted in the preparation of this consolidated investment report, with additional input provided by CCCCDC.

# Your Portfolio

As of May 31, 2019

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The graphs below show asset allocations by market sector and by maturity. They do reflect our anticipation of a rate increase in 2019 – and possibly two –but not in the first quarter. This slowdown in rate hikes and the potential of decreasing rates indicates the need to extend portfolios. Extending now will lock in yields even though rates may decrease and provides for extra safety.
- The non-cash portion of your portfolio is yielding 2.59%.
