

## **Collin College RN-to-BSN Program**

### **END OF PROGRAM STUDENT LEARNING OUTCOMES**

1. The students will use clinical reasoning and knowledge based on the nursing program of study, evidence-based practice outcomes, and research studies as the basics for decision-making and comprehensive, safe patient and population care.
2. The students will analyze patient care technologies and information systems to support safe nursing practice and population risk reduction.
3. The students will lead safety and quality improvement activities as part of the interdisciplinary team and as an advocate and manager of nursing care.
4. The students will develop a plan to address health maintenance, health promotion and population risk reduction among diverse populations in the community.
5. The students will demonstrate ethical analysis and advocacy regarding institutional, local, national, and global policy issues.
6. The students will analyze leadership competencies that reflect the values and ethics of the nursing profession.
7. The students will demonstrate the use of knowledge acquired throughout the RN-BSN curriculum to promote an innovative healthcare change.
