Education has the power to raise students’ earning potential and increase their employability. In return for their investment in education, Collin College’s 2012-13 students will receive higher wages that will continue to grow throughout their working lives.

EDUCATION MAKES A DIFFERENCE IN PEOPLE’S LIVES

- Collin College provides an environment for students to learn the skills they need to gain and maintain productive employment.
- The training and credentials that students acquire at the college increase their earning potential and help put them on the path to fulfilling and prosperous careers.

EDUCATION RETURNS VALUE FOR MONEY SPENT

- To meet the costs of going to college, students rely on their own earnings or on the earnings of their families. At Collin College, students paid a total of $48.3 million in FY 2012-13 to cover the cost of tuition, fees, books, and supplies.
- While at college, students spend time focusing on their studies, time they would have otherwise spent in employment or with their families and friends. For Collin College students, the value of time and earnings forgone was estimated to be $276.4 million (less offsetting monies received from residual aid).
• In return for the costs of going to college, students will receive a stream of higher lifetime income. These income gains will fully recover the money that students invested and will continue to grow throughout the students’ working lives.

EDUCATION INCREASES PEOPLE’S EARNING POTENTIAL

• Average annual incomes increase as students attain higher levels of education. On average, associate’s degree completers in the Collin College Service Area will earn $45,500 at the midpoint of their careers, $11,900 more than someone with a high school diploma.

• Associate’s degree completers will earn $1,760,850 (undiscounted) over their working lifetime, an increase of $460,530 compared to someone with a high school diploma.

EDUCATION IS ONE OF THE BEST INVESTMENTS STUDENTS AND THEIR FAMILIES CAN MAKE

• Collin College’s 2012-13 students will receive an average annual rate of return of 15.6% on their investment in the college. This rate of return continues throughout their working lives.

• Had students and their families taken the money they spent on education and invested it instead in a standard bank savings account, they would have received a rate of return of less than 1%.

• On average, Collin College’s 2012-13 students will receive a cumulative $3.70 in higher future income for every $1 they invested in their education.
